SKILLS

- **Languages:** Python, C, JavaScript
- **Frameworks:** HTML, CSS, Node.js, React.js
- **Tools/Platforms:** MySQL, Postman, Docker, Render, Neon (PostgreSQL), Figma
- **Soft Skills:** Problem-Solving, Adaptability, Creativity, Teamwork

PROJECTS

Watch Party: [Link](#)

April 2026

- Architected a real-time Watch Party web application that enables users to create and join virtual rooms for synchronized video streaming and collaborative viewing.
- Built a responsive, modern frontend using React.js and Tailwind CSS, delivering a seamless user experience across desktop and mobile devices.
- Integrated JWT-based authentication, role-based access control (RBAC), and WebSocket-powered real-time synchronization for video playback, live chat, and instant room updates.
- Implemented host and viewer role management with synchronized playback controls, including play, pause, seek, and volume, ensuring a consistent viewing experience for all participants.
- Improved FastAPI backend services by optimizing REST APIs and WebSocket connection handling to improve scalability, reduce playback desynchronization, and support multiple concurrent users.

Tech: React.js, FastAPI, Python, WebSockets, JWT Authentication, REST APIs

Split It: [Link](#)

March 2026

- Engineered a full-stack expense-sharing platform that enables users to create groups, track shared expenses, manage balances, and settle payments.
- Implemented secure JWT-based authentication and authorization with password encryption using bcrypt.
- Developed and integrated RESTful APIs using FastAPI and SQLAlchemy for efficient management of users, groups, expenses, and settlements.
- Designed automated expense-splitting algorithms supporting equal, percentage, exact, and custom split methods.
- Crafted a responsive, user-friendly interface using React.js and Tailwind CSS, optimized for both desktop and mobile devices.

Tech: React.js, Tailwind CSS, FastAPI, SQLAlchemy, SQLite, JWT Authentication

CUBE: [Link](#)

Aug 2024

- Created a Unity-based endless runner game with automated player movement and real-time obstacle interaction.
- Constructed core gameplay systems including collision handling, obstacle generation, and difficulty progression.
- Enhanced gameplay experience through smooth controls, improved physics, and performance tuning.

Tech: Unity, C#, Unity Physics Engine, Collision System

CERTIFICATIONS

- Python Programming Language with OOPs - Cipher Schools [Link](#) July 2025
- Privacy and Security in Online Social Media – NPTEL [Link](#) Oct 2025
- Build Generative AI Apps – Infosys [Link](#) Aug 2025
- ChatGPT-4 Prompt Engineering: Generative AI & LLM - Infosys [Link](#) Aug 2025

Extra co-curricular

- **HACK IOT – Hackathon Participation:** [Link](#) Feb 2024
Contributed to the development of a learning platform prototype and received a Certificate of Participation.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering – **CGPA: 6.51** August 2023 - Present
- **Maharishi Vidya Mandir** Prayagraj, Uttar Pradesh
Intermediate; **Percentage: 71** June 2020 - July 2021
- **Maharishi Vidya Mandir** Prayagraj, Uttar Pradesh
Matriculation; **Percentage: 83.3** April 2018 - May 2019
